

5200D RACKMOUNT NEWS MIXER

THE 5200D IS PERFECTLY SUITED for news and small production projects. Its combination of mic, line and AES inputs is a perfect match for local and router accessed sources. It has a monitor mix, an assignable mix-minus mix and even built-in headphone and cue amplifiers.

- Five inputs: microphone preamp, stereo line and 3 AES digital inputs
- AES program and MXM outputs
- Analog program and MXM outputs
- 8-character router source display for AES inputs 1 and 2
- Stereo PROGRAM mix
- MXM assign
- CUE function
- Monitor source select (PGM, CUE, EXT)
- Headphone amp (built-in)
- Headphone jack
- Cue speaker w/built-in amp
- Mic inputs (XLR) front and back
- LED VU meters follow monitor source select
- Rear interface gives you choice of CAT5 or DB-25 connectors
- GPI start commands through rear DB-9
- External monitor input
- Built-in power supply
- Two rack spaces high

INTERFACE IS SIMPLE

You can use a combination of CAT5 or DB connectors—it's just that fast. A GPI output port is also available on the DB-9.
