### **University of Louisiana to Outfit KRVS-FM 88.7 Studios with Wheatstone E-Series Audio Network**

NEW BERN NC USA (September 18, 2008) – Wheatstone Corporation announces the sale of an E-Series Audio Network to the University of Louisiana for use in the KRVS-FM 88.7 studios. The new audio infrastructure is comprised of one Evolution 6 control surface, three Evolution 5 control surfaces along with two E- Sat I/O frames, all of which will interface with one Bridge Router located in the central rack room. The facility will utilize Wheatstone's Ethernet Audio Driver in tandem with PCs that will be streaming single stereo channels in and out of the Bridge digital audio network via standard Ethernet networking.

The facility will also take delivery of three rooms of TechLine studio furniture. Chief Engineer Karl Fontenot stated that the decision to go with this particular system was based on the "strength and durability" of the Wheatstone infrastructure and the overall reduction of cable costs.
