Wachovia Video Network Expands with Wheatstone D-9 Television Console

NEW BERN (June 12, 2007)– The Wachovia Video Network, a private corporate network facility based in Charlotte, has ordered a Wheatstone D-9 television console for use in their satellite-delivered programming for both live and edited company content, which is available as media download-on-demand to more than 80,000 employees. “With the increased demand on program content from the various lines of business offered by Wachovia, a new direction in communication has dictated a need to expand to a greater digital work process and with the Wheatstone D-9, the department will enhance its audio needs and address future growth for the facility,” stated Senior Engineer Randy Epting. Wachovia Video Network also offers services to media outlets and national networks at request for live interviews from company executives and economic representatives.

For more information regarding all new products please visit: www.wheatstone.com during the NAB 2007 show.
