Wheatstone to provide networked audio control systems and television consoles for NBC Universal O & O stations

NEW BERN (July 22, 2007)– Wheatstone Corporation has been awarded contracts to provide networked audio control systems and television consoles for several NBC Universal O & O stations. The first station in the series, Los Angeles-based KVEA, has received one of Wheatstone's new D-10 digital television consoles along with a Bridge router networked audio system that will integrate seamlessly into their Ross Automation production control system. Installation at the KVEA site is already underway. Subsequent projects include KXAS and WMAQ. KXAS recently shipped and consists of one D-10 console and one Bridge networked audio system for use at their facility located in Dallas. WMAQ in Chicago is also scheduled to take delivery of a Bridge system plus one D-10 television console equipped with expanded input/output functionality.
