

**PACIFIC RESEARCH &
ENGINEERING**

THE OASIS APP

The Oasis Control Center application (OCC app) is typically installed on an engineering department Windows® laptop computer. It comes as a zipped folder (current version: OCC_app_v26.zip) that includes the FTDI drivers for Windows computers and a folder with several default factory configuration files. Using the OCC app, these files can be uploaded to an Oasis console to return it to factory default settings.
